

Ujas Shekhat

Web Application Developer

ujas.code@gmail.com | [in Profile](#) | [G Profile](#) | [Portfolio](#) | [Business](#)

Professional Summary

Full Stack Web Developer specializing in modern web application development with Next.js, React.js, JavaScript, Node.js, Express.js, and MongoDB. Experienced in building responsive, scalable applications with REST APIs, authentication, database integration, and deployment. Combines frontend and backend development to deliver reliable, business-focused digital solutions.

Educational Background

B. S. Patel Polytechnic - Ganpat University

Diploma in Information Technology, (2021–2024)

U.V.Patel College of Engineering - Ganpat University

B.Tech in Information Technology, (2024–2027)

TECHNICAL PROJECTS

LifeLink (2026) | Live - [Visit](#)

Developed a hospital-to-hospital organ exchange platform focused on emergency donor and recipient coordination. Implemented role-based workflows for administrators and hospitals with secure authentication. Integrated REST APIs, MongoDB, Google Maps API, and notification workflows. Designed workflows for donor matching, hospital verification, and emergency coordination.

Code4Web (2026) | Live - [Visit](#)

Built a full-stack website template marketplace for browsing, purchasing, and customizing web templates. Developed responsive frontend interfaces with Next.js, React.js, and Tailwind CSS. Integrated Supabase for database operations and authentication workflows

Premium Dairy (2025) | Live - [Visit](#)

Developed a web-based management system for dairy farm and ice cream business operations. Built structured frontend workflows and connected the application to backend services. Focused on practical business operations and responsive web access.

Unfit to Fit (2024): Live - [Visit](#)

Built a responsive fitness-focused website with structured navigation and interactive frontend elements. Implemented mobile-friendly layouts and client-side interactions.

Rock Paper Scissors Game (2023) | Live - [Visit](#)

Built a responsive Rock Paper Scissors game using HTML, CSS, and JavaScript, featuring computer-generated moves, real-time score updates, game result notifications, and an interactive user interface.
